Professional Summary

A full-stack software engineer with over three years of experience engineering mission-critical applications for regulated industries. I transform complex business requirements into secure, scalable, and high-impact enterprise solutions. My expertise lies in architecting robust systems, leading the development of secure APIs, engineering high-volume data pipelines, and leveraging cloud platforms like Azure and GCP to build resilient, scalable infrastructure.

Core Competencies

Languages & Frameworks	Databases & APIs	Cloud & DevOps
C#/.NET	Microsoft SQL Server	Microsoft Azure
JavaScript/TypeScript	MySQL	Google Cloud Platform
React/Next.js	PostgreSQL	Docker
Node.js	MongoDB	CI/CD
PHP/Laravel	RESTful APIs	Git
Testing Frameworks		Agile / Scrum

Professional Experience

RedMane Technology
Software Developer *Aug 2023 – Jul 2025*

- Engineered secure APIs and data integration components for the Arkansas Child Welfare Information System (CWIS), ensuring seamless and compliant communication between state and external government platforms.
- Architected technical solutions by translating complex business requirements from cross-functional teams and state stakeholders into robust, compliant software.
- Spearheaded the implementation of automated testing with Playwright for a proprietary case management solution, guaranteeing system reliability and robust quality assurance.

VanDyk Mortgage
Systems Developer *Apr 2022 – Aug 2023*

- Architected and maintained high-volume C#/.NET loan processing pipelines, ensuring mission-critical system reliability for nationwide mortgage operations.
- Led the full-stack development of an in-house HR application using Next.js, streamlining employee onboarding and significantly reducing processing time.
- Engineered a comprehensive data warehousing system for loan data, automating processing and dramatically improving data accessibility and operational efficiency.
- Built a custom CMS with PHP/Laravel, empowering loan originators to simplify website management and enhance their digital presence.
